(54) DIGITAL PRINT DISTRIBUTION SYSTEM VIA INTERNET

(57) Abstract:

PURPOSE: A digital print distribution system via internet is to distribute and sell digital print presented as the original quality at a low price via internet.

CONSTITUTION: An artist's work(10) processed with slide film is processed with computer graphic and film scanning (14). A flaw of the scanned work film is removed and the color is controlled, and it is saved by calling image data with image server. The artist and work information are processed and classified and it is saved by calling information data with DB server. Digital print of image data with the original quality saved in image server through application server(22) on internet(24) and data of the proper information saved in DB server(34) may be provided.
